About Me

Seeking a challenging position as a Frontend Web Developer where my technical skills in JavaScript, HTML, CSS, Bootstrap, ReactJs, NodeJs, Java and database management system MySQL and Mongo DB can contribute to the development of innovative web solution.

Skills

- Programming Skill
- Communication Skill
- Team Work
- Technical Skill
- Creativity
- Leadership

Education

- Diploma Course**
MSBTE University 2021-2024
I have completed my diploma in computer science engineering from Shri Siddheshwar Women's Polytechnic ,Solapur.
- Bachelor Of Technology**
Solapur University 2024- 2027
I have pursuing engineering in computer science engineering from Brahmdevdada Mane Institute Of Technology Solapur

Projects

- Student Networking & Collaboration Platform**
Final Year 2023-2024
Online Student Platform (Simplified):-
This is an all-in-one website made for students to succeed in and out of school.It helps students by focusing on new ideas, teamwork, and honest work. Students can:
 - Connect with others and share knowledge.
 - Work together on projects.
 - Join events.
 - Find freelance jobs.The main goal is to get students ready for job interviews and help them reach their school and career goals, all while helping the whole learning community grow.
- Virtual Wall Decoration**
Mini Project 2024-2025
This website is an easy-to-use online tool called the Virtual Wall Designer.Its main purpose is to let you design and see wall decorations digitally before you apply them in your actual home. You can upload a picture of your wall and then play around with different colors, wallpapers, textures, and patterns to get a realistic preview of the finished look.This helps you make better decisions, eliminates guesswork, and ultimately saves you time and money on interior decorating mistakes.It is a convenient tool for anyone homeowners, decorators,who wants to plan and customize wall designs from their computer or mobile device.

Internship

Company Code Tech IT Solutions

I have completed Frontend Web Development Internship of One month form 10 July 2025 to 10 Aug 2025.
From this internship I learn (or gain the knowledge of) real time projects and I also share my projects on github.
